

Rossana Fruit L.t.d.is a family owned company for production of both Glacè and Concentrate certified fruit and we are proudly to say that we are at the third generation inside the business of preserved fruit.

This is what we have tried to put across of the past 50 years:the great, strong, stainless sense of belonging of the Avitabile family to the company, intended not just as an industry, machines and buildings, but as a microcosm made up of men and women who have often spent the best years of their lives inside the walls of these buildings, each one of them contributing a part of themselves to every single product which has emerged from our factories.

QUALITY CONTROL:

We use only fresh fruits selected from quality varieties grown to stay juicy and with irresistible taste.

We do not compromise on quality!

Our facility has modern equipment for selection, processing and packaging.

We maintain a high quality standard at all stages of production comply with the European Food Safety Regulation FSSC 22000/HCCP and are certified by :
